Subject: ANNOUNCEMENT: ASSIST AI Transfer Articulation & Exploration Tool Launched!
Date: Monday, November 9, 2026 3:04:00 PM
Attachments: image002.png

Greetings!

ASSIST Central Services is delighted to announce that ASSIST's AI Transfer Articulation & Exploration Tool was successfully launched on October 27th to assist.org! In less than two weeks, the tool has been utilized in over 6,000 unique conversations, and users are getting the data they need quickly. More than half (51%) of all search intents have been focused on articulation information, with searches also performed for course lookups (31%), transferability (11%), and similar courses (~7%).

The tool offers an enhanced, user-friendly search experience for published articulation data for academic years 2023-2024 and beyond, as well as full transferability data. The AI Transfer Articulation & Exploration Tool searches only within published ASSIST databases; it does not search the World Wide Web. This ensures accurate articulation and transferability information for assist.org users. Therefore, you will not find information about course scheduling, course modality (e.g., in person, online, etc.), or other institutional information outside of what is featured on the assist.org website.

To use the tool effectively, focus on one course at a time by providing the AI Assistant with either a California Community College course or a course offered at a participating 4-year college or university. The AI Assistant will help you locate articulation information with other institutions and, where applicable, full transferability approvals. Finding the new AI Transfer Articulation & Exploration Tool on assist.org is easy! It is located in the middle of the page, in the lower half of the screen, under the articulation agreements search box. To get started, simply enter your course information or question in the box. This will open a chat with the AI Assistant.

We invite you to review the newly available resources:

Please share this announcement widely with your institutional and intersegmental colleagues. To provide feedback on the tool, please complete a quick survey.

Best regards,
ASSIST Central Services
